

Data Science Master Virtual Internship

Work Done & Learning Outcomes

STUDENT	Pragya Kumari
PROGRAM	B.Tech CSE, IILM University, Greater Noida
DURATION	8 Weeks April – June 2026
INDUSTRY SUPPORT	Siemens Industry Software (India) Pvt. Ltd.

OBJECTIVE

Developing practical skills in data science, statistical analysis, data visualization, and machine learning through a structured, hands-on virtual internship.

Work Done During the Internship

A structured, six-stage hands-on workflow completed across the internship modules

Technologies & Tools

The core toolkit used across data handling, analysis, modelling, and version control

Python 3

Programming and data analysis

Jupyter / Colab

Development environment

Pandas & NumPy

Data handling and numerical operations

Matplotlib & Seaborn

Data visualization

Scikit-learn

Machine learning

SQL

Basic querying and data extraction

Git & GitHub

Version control

AICTE-EduSkills LMS

Learning modules, assignments & assessments

Methodology Followed

A structured, module-based approach broadly aligned with the CRISP-DM framework

WHAT I PRACTICED

- Dataset inspection and data quality analysis

- Missing-value and outlier handling

- Statistical summaries

- Visualization-based analysis

- Machine learning model application

- Performance evaluation

- Interpretation of data-driven insights

- Completion of module assignments and final assessment

Key Outcomes & Skills Gained

Understanding of the end-to-end data science workflow

Practical experience with Python and data science libraries

Performing EDA and data visualization

Experience in basic predictive modelling

Improved understanding of statistics and machine learning

Interpreting and communicating data-driven insights

AICTE-EduSkills Certificate

Successfully completed the Data Science Master Virtual Internship

0

OUTSTANDING — FINAL GRADE

Ready for entry-level
data roles

“The internship strengthened my practical foundation in Data Science and prepared me for future academic projects and entry-level data-focused roles.”
